

The only approved garage door for use for the Cloisters is the:

CHI Recessed Combo Panel Model 2296 (NO GLASS).

The owner can re-submit using this door in the Standstone color. The HOA will need to view their home to see if the Sandstone color is ok or if they will need to paint the door.

They must resubmit a new application with the correct door for approval before installation.

This door is in use at several homes along Valerian Lane and a couple on Gloxinia that have replaced doors.

There are 4 local dealers they can call or their own repair person, but this is the only door accepted by the HOA.
